Composition:

100% Treated polyester

FR Certification: :

BS7176 Crib 5, BS EN 1021-1:2006 1&2, BS5852 Crib 5, IMO Annex 1 Part 8.

Fabric care and maintenance:

• Use a vacuum cleaner or soft brush to remove dust and solid particles. • Always try cleaning products on a hidden piece of fabric to test suitability. • Wipe frequently with a damp cloth to maintain the appearance of the fabric. • All spillages should be removed immediately with a clean absorbent cloth. • Poorly fixed clothing dyes, e.g. Denim, will cause permanent staining. Most stains can be removed using cold/warm water and a clean microfibre cloth. • Stains from products containing oil and grease should be treated with a spirit based solution. • Can be steam cleaned in situ. • Can be cleaned with mild Hypochlorite solutions (up to 10,000 ppm of available chlorine - including Haz Tabs and Chlor-Clean) or Mineral Spirit for infection control purposes. • If soap based cleaners are used, all soap residues must be rinsed from the fabric. • Do not machine wash or dry clean. • Remove all stains immediately before they set. • Please refer to the Pearl Fabric Technical Specifications PDF download on the Agua website for further details. • Do not use solvents, chemical agents, waxes or polishes as this will damage the surface of the fabric.
