Roku[®] Keata

Roku[®] Keata

A versatile, compact, multi-environment moulded chair designed for high security use both indoor and outdoor.

- **100% Designed**
- **100% British**
- **100% Recyclable**

"Roku® Keata builds on the legacy of the original Roku® concept - namely a chair which is difficult to manoeuvre, with ligature free design and no protruding corners or areas for concealment.

The challenge was to create a versatile, compact chair with progressive styling and visual appeal. With its sculpted, soft form, Roku® Keata is designed for use in dining, bedroom, reception and outdoor areas - robust enough to meet the requirements of a wide range of environments including challenging behaviour."

Ben Grafton

Roku® and Roku® Keata
designed by award winning healthcare
seating designer **Ben Grafton**.

New
