

Solutions for HealthCare

Welcome to the Teal HealthCare brochure.

Based on good design, our innovative, class leading products help to transform clinical environments and create bright, contemporary spaces that complement latest healthcare interiors.

While meeting the needs for ergonomic design, infection control, postural support and pressure management we help to create inclusive environments which aid engagement between patients, their families and healthcare professionals in acute hospital settings, integrated health and social care hubs, primary or intermediate care.

We have created highly configurable modular seating and multi-option seating families to meet the needs of patient groups with differing abilities, including paediatrics and person centred dementia care.

A bit about us

Everyday we design, make, deliver and install into NHS Trusts, Health Boards, private hospitals and residential care settings across the UK.

The bigger picture

Based in Lancashire and with its own manufacturing and operations across multiple sites Teal is part of The Senator Group - the largest manufacturer of commercial furniture and workplace solutions in the UK and the leading investor in Research, Development and Design. With facilities in Europe, the US and Middle East, Senator is a global brand. And even though Senator exports to over 70 countries, has a turnover of £140m and over 1300 employees, it is a family run business.

Improving the patient experience

For healthcare environments the ethos is to design and install innovative healthcare furniture which improves the patient, visitor and staff experience, creating environments which help to deliver world-class care. Our expertise and resources are in place to deliver rolling installations for large NHS Hospitals, to state-of-the-art new builds and smaller bespoke programmes.

Installation

Robust production, manufacturing, quality and project management underpins everything we do. Installation services are managed by a dedicated Account Manager, who in conjunction with the Project Manager coordinates all aspects of the delivery and installation, including full site survey with detailed RAMS. A skilled, nationwide team carries out the installation in line with ISO9001 procedures. Employees are CSCS approved.

Service support

We have a nationwide Service Support Team in place as part of our commitment to customer aftercare.

teal

NHS

Private healthcare providers

Our approach

Teal delivers its capabilities through three integrated brands:

Teal HealthCare

An award winning provider of innovative, high quality patient seating, ward furniture and specialist products for healthcare. The major provider of Ward and Residential Furniture to the NHS throughout the UK.

Teal LifeCare

Collections are designed to meet the specific requirements of dementia, challenging behaviour, learning disabilities and mental health.

Teal LIVING

A range of design led products and turnkey solutions aimed specifically at the residential care market, offering classic styles with a twist, without compromising the needs of clients with specific conditions, including dementia and elderly care.

Solutions

It's all about understanding the issues.
Finding solutions.
[Rethinking healthcare environments.](#)

Teal is a solutions driven company
with innovation at the heart of
everything we do.

Design & manufacture

Teal combine imaginative design with practical application, placing the user at the heart of the process - creating innovative products both appropriate for the environment and the welfare of caring professionals.

- Leading investor in Research, Development and Design
- Significant investment in latest technologies, equipment and Lean initiatives
- Consideration for sustainability and end of life recycling
- Zero carbon manufacturing
- Manufacturing flexibility with bespoke product design

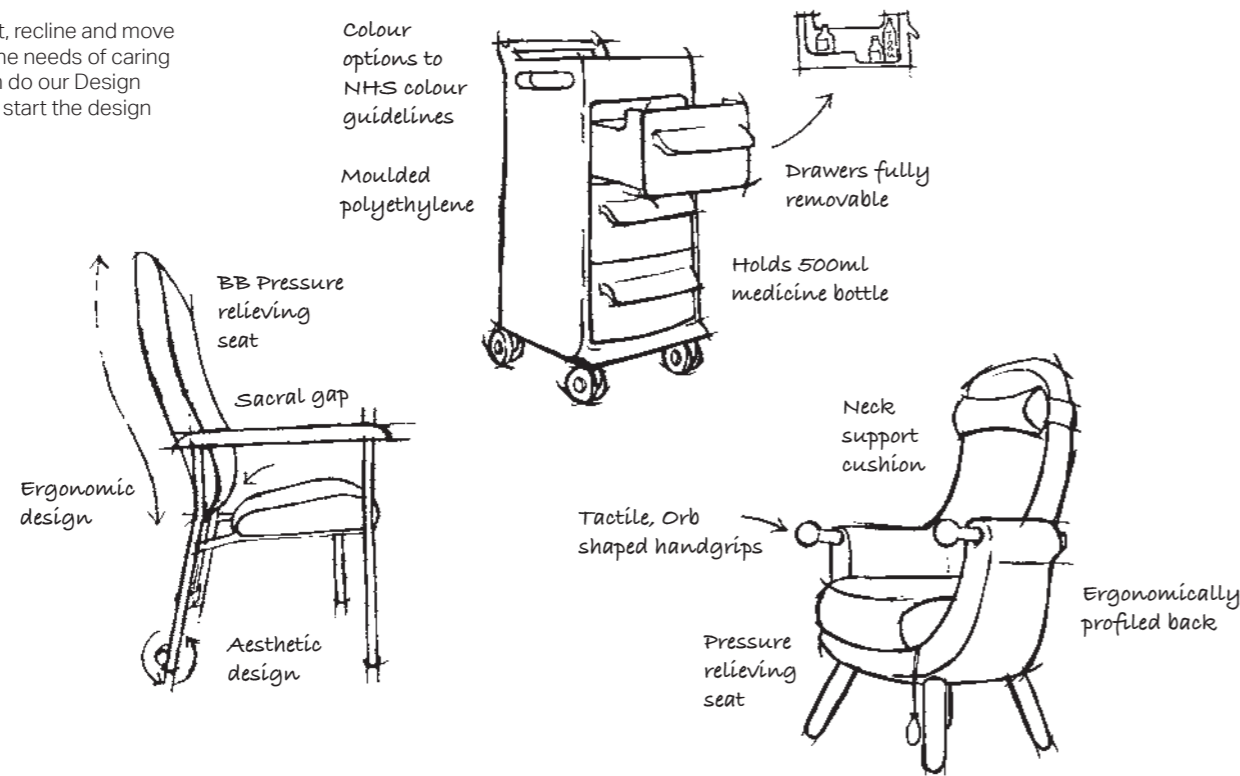

Innovation engineered

With every Teal design comes a great deal of thought. The design process begins way before pencil reaches paper, beginning with the client and carer.

We look at how users sit, recline and move and how we can meet the needs of caring professionals. Only then do our Design and Development team start the design process.

We create designs which not only enhance the environment, but are fit for purpose.

Testing & standards

Quality Management

- ISO 9001:2015 Quality Assurance Accredited and operate comprehensive quality management procedures, covering all aspects of design, manufacturing, distribution, customer service and after-care.

Environmental Certification & Accreditations

- ISO 14001:2004 Certified
- Health and safety - Accredited to BS OHSAS 18001:2007
- Furniture Industry Sustainability Programme (FISP) which promotes sustainable development as a strategic business issue.
- Furniture Industry Research Association (FIRA)
- British Contract Furniture Association (BCFA)
- FSC Certified

Guarantee

- Teal offer an unrivalled guarantee, subject to standard terms and conditions. Visit www.teal.co.uk for details

Teal chairs and derivatives are tested to meet strength, durability & safety requirements.

Sustainability

We look at Reducing and Reusing before we start thinking about Recycling.

These 'Three Rs' have a strong influence over our business from design and production right through to delivery. We've been carbon neutral since 2010.

Our eight rules for minimising impact on the environment:

1. Sustainable design is integral to every product brief
2. Minimise the use of virgin materials in the manufacturing process
3. Source from managed, sustainable & certified FSC timber suppliers
4. Use fully recyclable materials
5. All packaging to be reused or recycled
6. Redundant furniture recycled or reused
7. End of life MFC sent to biomass generators
8. Eliminate our carbon footprint.

Recycling

Working alongside the Environment Agency we have created our own in-house recycling facility for old furniture, which is disassembled into components and segregated into waste streams for recycling - typically wood, metal, plastic, fabrics and foams. A certificate is issued to confirm recycling in an environmentally friendly manner.

Design solutions

Supplying into a diverse range of healthcare environments.

Teal supply into a diverse range of healthcare environments, offering a one-stop solution to healthcare providers. We are one of the largest providers of Ward and Residential Furniture to the NHS and to some of the largest adult and children's hospitals in the UK.

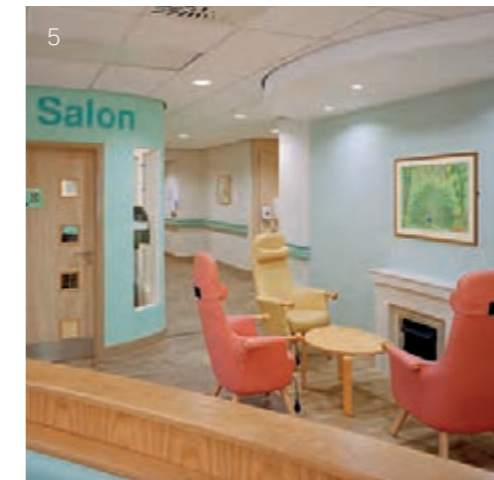

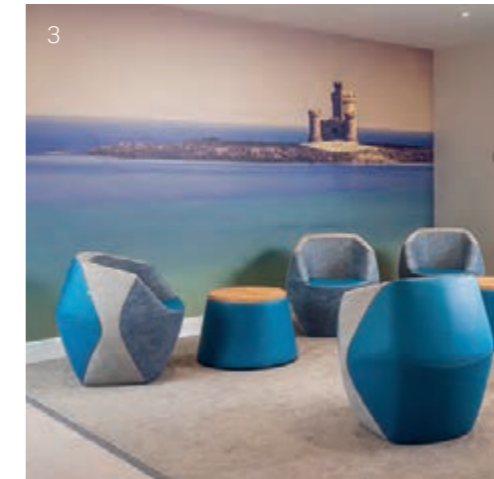

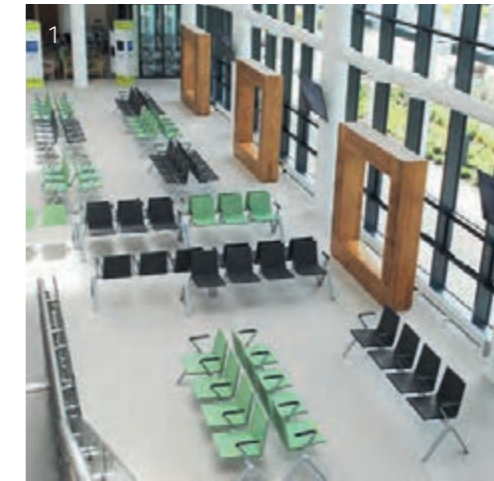

We help satisfy the rigors of clinical environments, promote patient dignity and contribute towards a therapeutic and healing patient environment. Innovative projects have included 'dignified spaces', a pioneering nature inspired project which incorporates dedicated spaces for conversations between clinical staff, carers and relatives.

We have installed healthcare furniture into many intermediate care settings, recognising this important transitional phase in many older people's journeys of care. For paediatric care we have designed bespoke bedside lockers with distinctive new artworks, while the award winning Buddy day bed - winner 'Best product for improving the patient experience' has allowed family sleepovers in patient rooms.

Products such as the innovative, distinctively styled dementia friendly Velvare armchair have been installed at an award winning Dementia Resource Hub, helping to improve the environment of care for people with dementia.

We support care and rehabilitation for those with mental health issues, providing furniture for all environments, including CAMHS, older adults, learning disabilities, PICU, medium secure, eating disorders, autism, dementia and high security environments. Our anti-ligature, concealment free designs promote safe, positive environments which focus on treatment and recovery.

1. Acute hospital care
2. Paediatrics
3. Mental health behavioural units
4. Residential care
5. Dementia Resource Hub
6. Intermediate care

Case studies

Great Ormond Street Hospital.
Great Ormond Street Hospital for Children
NHS Foundation Trust.

A redevelopment programme at Great Ormond Street Hospital helped create new facilities appropriate for world-class paediatric care and research. The Great Ormond Street Hospital Children's Charity committed £84 million to the project, ensuring patients benefit from spacious, airy environments with distinctive new artworks, where staff can care for children and their families in safer, more comfortable environments. Teal equipped the new Premier Inn Clinical Building with its award winning Buddy day bed – ideal for family sleepovers in patient rooms. Teal worked closely with the Trust to develop enhanced infection control features. Similarly, the Cascade Monos bedside locker required high levels of infection control, which Cascade satisfied with its solid polymer construction and sealed joints. In this pioneering commission Teal co-ordinated the locker artwork to help create environments for children full of colour and intrigue.

South Tyneside NHS Foundation Trust

Teal equipped Haven Court, South Tyneside's £9m centre of excellence for joined-up care for older people with its styled, contemporary furniture and soft furnishings, helping to create an inviting environment which enhances user experience.

The state-of-the-art hub, the largest of its kind in the country provides integrated health and social care services for the Borough's older people, their carers and families. The 80-bed development provides a wide range of high quality support and care services, including residential, respite care, day and rehabilitation services, helping to improve the health and wellbeing of the community's growing ageing population and the increasing numbers of people with dementia.

Morrison Hospital.
Abertawe Bro Morgannwg
University Health Board.

Teal worked in close collaboration with key stakeholders at Morrison Hospital, as part of a £60m flagship hospital project at the Swansea site. Clinical staff, including Infection Control and Physio teams played a key role both in the design of the facilities and healthcare furniture, helping to ensure the environment supports the needs of both patients and services. New public waiting areas including main atrium, paediatrics, radiology and renal areas are equipped with 'Adeo' reception/atrium seating, designed to create a bright, contemporary and non clinical feel. This followed a 9-month trial, where the units were in daily use within the hospital.

HealthCare options & standard features

Flexible options

Addressing the needs of Infection control, pressure management, manual handling and postural support, with bespoke upholstery options.

Infection control

- Seating ranges incorporate Medicote™ lacquer which prevents bacteria – including MRSA, E-COLI and other bacteria, reducing deterioration, discolouration & odours.
- A Sacral gap allows for easy cleaning in line with infection control protocol.

High performance fabrics - leading the way in infection control

- Wipe down moulded seat bases on patient seating
- KYDEX® anti-bacterial finishes on lockers and overbed tables, with smooth surfaces and sealed joints for infection control
- Award winning KwickScreen® patient dignity screens provide flexible space management with enhanced infection management
- Salus and Adeo chairs feature Medipur™ anti-bacterial finish with continuous anti-bacterial and anti-fungal protection.

Bespoke upholstery

- Fully sealed 'Complete Upholstery' seating options for ease of cleaning.

Tissue viability

- For mobility impaired, patients with wounds or those at risk of pressure sores a range of Reflexion® pressure relieving foams are available.

Fabrics & Finishes

Teal source contract fabrics from market leading manufacturers

- Durable and resistant to abrasion, a range of fabrics are available to meet the specific demands of the healthcare environment.
- Many are stain resistant, waterproof and have anti-microbial, anti-fungal properties to help reduce the risk of healthcare associated infections.

Fabric Swatches

Please contact Teal Customer Services for help in the selection of a suitable fabric for your environment

- Standard fabric colour swatches can be viewed at www.teal.co.uk
- Fabric cards are available on request - please contact Teal customer services.

Customer’s Own Fabrics: Teal can upholster in a customer’s own material. Please contact Customer Services prior to placing an order.

Cleaning and Maintenance

Always follow the care and maintenance procedures specified by the fabric manufacturer.

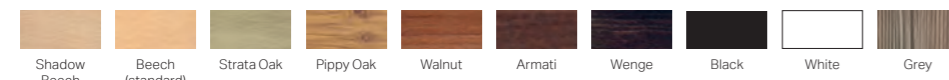

For general guidance:

- Clean and care for the fabric on a regular basis to maintain condition and appearance. Most stains can be removed by wiping clean
- Wipe clean regularly with a damp cloth to remove dust particles and light soiling
- Remove spillages promptly (within 15 minutes) with an absorbant dry cloth
- E cloths are recommended for general cleaning of upholstery. Information for general guidance only
- Always refer to manufacturer’s cleaning instructions for details specific to the chosen fabric

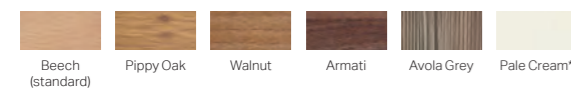

Testing and Standards:

All fabrics and vinyls pass BS5852 Ignition Source 5 or higher and BS7176 Medium Hazard. All foams are combustion modified high resilient fire retardant (CMHR).

Healthcare Pressure Management

To meet the pressure management needs of a variety of client groups, Teal offer four seat grade options. All are available with multi-directional stretch upholstery.

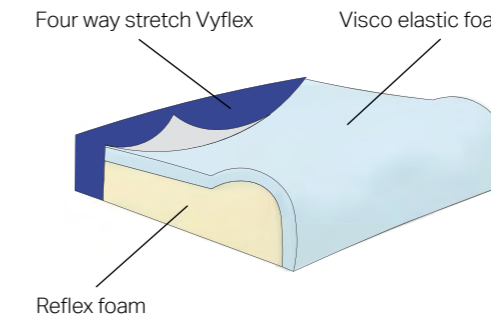

- 1. High grade polyurethane CMHR foam** (standard) - healthcare grade, suitable for very high use areas
- 2. Low risk comfort cushion (AA)** - Provides low risk pressure relief and support for clients with good posture and mobility.
- 3. Medium/High risk Reflexion® Visco foam (BB)** - Reflexion® foam system reacts to the users body heat and moulds to the body's shape, distributing weight evenly, reducing risk of tissue damage and improving circulation.
- 4. High risk (CC)** - Reflexion® foam system with gel insert to provide high levels of pressure care.

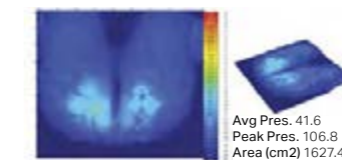

AA Low Risk Comfort Cushion (AA)

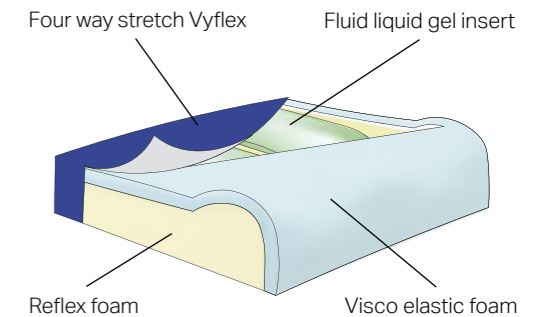

Standard High Grade CMHR Foam

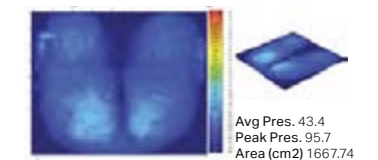

BB Medium/High Risk Reflexion® Visco Foam (BB)

Low Risk AA Grade

CC High Risk Gel Insert with Reflexion® Visco Foam (CC)

Medium/High Risk Reflexion BB Grade

Note:
Pressure mapping produced using an XSensor X3 system, with a healthy 80kg (12.5 st) male subject. Cadet vinyl used on standard and AA grade cushions, Vyflex used on BB and CC cushions.

The mapping gives a good indication as to the effectiveness of the cushion but its use must be combined with a programme of nursing care for the individual patient.

Pressure Mapping
Pressure mapping service available using trained Teal account managers and the X Sensor X3 system.

Options & Accessories

Teal offer a range of accessories for Infection Management, Manual Handling and to meet the needs of a variety of client groups

Seat Height Adjusters
HA
Leg adjustment of up to 100mm (added to lowest seat height offered).

Seat Height Adjusters with housekeeping wheels
HARW
Height adjustment/improved mobility.

Braked Castors
BC
Fits most patient seating

Comfort Waterfall Seat Cushion
WS
Provides support to back of knees

Welded Seat Seams
Welded seams available in breathable, waterproof, anti-fungal Dartex performance multi-stretch fabric.
- Prevents ingress of bodily fluids for infection management
- Available for use on Teal patented removable seat platform, used on the Aylesbury and Gemini patient chairs
- Particularly suitable for use with pressure relieving foam options
- Please contact our sales team for available colour options

Medicote™
Teal patient chairs incorporate two coats of clear Medicote™ anti-bacterial lacquer to provide lifelong protection and infection control. Medicote™ is formulated to include an agent that stops bacteria surviving on the surface. 448 Medicote™ will prevent the spread of Staphylococcus Aureus (MRSA), Escherichia Coli 0157 (e.coli), Salmonella Enteritidis, Bacillus Cereus (food poisoning) and other bacteria with a kill rate of 99% within 24 hours. (Accredited by Law Laboratories, ref 05H547).

Medicote™ also reduces the risk of deterioration, discolouration and odours caused by micro-organisms.

Removable Seat Platform
RP
Two seat depths possible 445mm/480mm
Allows interchangeability of seat cushions for pressure reduction.
Can be used with dynamic systems.
Wipe down for hygiene control

Removable Seat
RS
Upholstered onto rigid plastic platform
- two seat depth adjustments
